

Pressatubi Compak 1
Crimping machine Compak 1
Sertisseuse Compak 1

- Capacità 1/4" - 1/2" (2 spirali)
- Leggera - può facilmente essere trasportata
- Design unico e economico
- Hose Capacity 1/4" - 1/2" (2 wire)
- Light weight - Can easily be carried for on site repair
- Unique design and competitively priced
- Capacité 1/4" - 1/2" (2 spirales)
- Légère - peut facilement être transportée
- Dessin unique et bon marché

Pressatubi H25 Eco QC
Crimping machine H25 Eco QC
Sertisseuse H25 Eco QC

- Capacità 3/16" - 1" (4 spirali)
- Calibratore di base con quadrante indicativo di posizione
- Sistema di cambio rapido dei morsetti integrato alla base
- Hose capacity 3/16" - 1 1/4" (4 wire)
- Simple dial adjusted calibrator
- Integrated quick change system
- Capacité 3/16" - 1" (4 spirales)
- Calibreur de base avec cadran indicatif de position
- Système d'échange rapide des bornes intégré à la base

Pressatubi H50 Eco
Crimping machine H50 Eco
Sertisseuse H50 Eco

- Capacità 3/16" - 2" (4 spirali)
- Calibratore di base con quadrante indicativo di posizione
- Inserimento facile dei morsetti
- Hose Capacity 3/16" - 2" (4wire)
- Basic dial adjusted calibrator
- Simple die changing
- Capacité 3/16" - 2" (4 spirales)
- Calibreur de base avec cadran indicatif de position
- Introduction facile des bornes

Per ulteriori informazioni potete contattare i nostri uffici commerciali.
 Su richiesta disponibili in gamma ulteriori articoli.

For more information, please contact our sales offices.
 On request available in range further articles.

Pour de plus amples informations, veuillez prendre contact avec notre bureau commercial.
 D'autres articles de la gamme sont disponibles sur commande.

Qui di seguito alcune delle applicazioni tipiche dei prodotti di questa sezione:

OLEODINAMICA

Macchine automatiche, industria ferroviaria, gru e macchine per sollevamento, fonderia e industria dell'acciaio, industria mineraria e perforazione, offshore, energia, movimento terra, lavaggio, industria del legno, agricoltura, presse, piattaforme aeree, navale, macchine per alimenti, estintori, militare, simulatori e apparecchiature per il divertimento.

PNEUMATICA

Packaging, food & beverage, plastica & gomma, Automotive, macchine tessili, assemblaggio e robotica, stampa e carta, macchine lavorazione legno, autobus, macchine stradali & fuoristrada, industria ferroviaria, camion e rimorchi.

FLUIDICA

Impianti aria compressa, impianti di raffreddamento/riscaldamento, impianti di scarico, impianti gas, impianti di nebulizzazione, impianti di vapore saturo, impianto solare termico, impianti acqua salmastra, impianti acque di processo.

Some of the typical applications for the products of this section are:

HYDRAULIC INDUSTRY

Automatic machines, railway industry, cranes and lifting machines, smelting and steel industry, mining and drilling industry, offshore, energy, earth-moving, cleaning, wood industry, agriculture, presses, aerial platforms, naval industry, food processing machinery, fire extinguishers, military industry, simulators and entertainment equipment.

PNEUMATIC INDUSTRY

Packaging, food & beverage, plastics and rubber, automotive, textile machinery, assembling and robotics, press and paper, wood processing machines, bus, cars & offroad vehicles, railway industry, trucks and trailers.

FLUIDICS INDUSTRY

Compressed air systems, cooling/heating systems, drain systems, gas systems, spraying systems, saturated steam systems, thermal solar systems, brackish water systems, process water systems.

Ci-après figurent certaines des applications typiques de cette section:

HYDRAULIQUE

Machines automatiques, industrie du chemin de fer, grues et machines pour le levage, fonderie et industrie de l'acier, industrie minière et perforation, offshore, énergie, machines de terrassement, nettoyage, industrie du bois, agriculture, presses, plateformes aériennes, industrie navale, machines pour l'industrie agroalimentaire, machines pour aliments, extincteurs, industrie militaire, simulateurs et équipement de loisir.

PNEUMATIQUE

Conditionnement, aliments et boissons, plastique e caoutchouc, automobile, machines textiles, assemblage et robotique, impression et papier, machine pour le traitement du bois, autobus, voitures et voitures tout-terrain, industrie du chemin de fer, camions et remorques

FLUIDIQUE

Installations à air comprimé, installations de rafraîchissement/rechauffement, installations de décharge, installations à gaz, installations de nébulisation, installation à vapeur saturée, installation solaire thermique, systèmes d'eau saumâtre, systèmes d'eaux de traitement.

**Accessori per oleodinamica,
 pneumatica e fluidica**

Accessories for the pneumatic,
 hydraulic and fluid sector

Accessories pour l'industrie
 oléodynamique, pneumatique et fluidique

**Boccole e raccordi a
pressione, nipli e adattatori**

Hydraulic fittings
Nipples and adaptors

Jupes et raccords a sertir
adaptateurs, mamelons

**Tubi oleodinamici
alta pressione**

Flexible hydraulic hoses

Tuyaux flexibles

Collari fermatubo

Clamps

Colliers de serrage

**Tappi e indicatori
livello olio**

Plugs and oil level indicators

Bouchons et indicateur
de niveau huile

**Raccordi pneumatici
in ottone nichelato
e tecnopolimeri**

Nickel-plated brass and
technopolymeric pneumatic
fittings

Raccords pneumatiques
en laiton nickelé
et technopolymères

**Tubi e accessori
per automazioni industriali**

Pipes and accessories
for industrial automations

Tuyaux et accessoires pour
systèmes d'automatisation
industrielle

**Raccordi in ottone, bronzo,
alluminio e acciaio inox**

Brass, bronze, aluminium and
stainless steel fittings

Raccords en laiton, bronze,
aluminium et acier inoxydable

Raccordi in ghisa

Cast iron fittings

Raccords en fonte

Innesti rapidi

Quick couplings

Coupleurs rapides

**Tubi e accessori
per automazioni industriali**

Pipes and accessories
for industrial automations

Tuyaux et accessoires pour
systèmes d'automatisation
industrielle
